## Our Role in the Call to #EmbraceEquity

At the Elmwood Community Resource Center (ECRC), we build communities and support neighbourhoods with resources that makes our community a great place to live, work and raise families. This includes embedding diversity, equity, and inclusion principles in all that we do at ECRC. That is why we join our voices to mark and celebrate this years International Women’s day under the theme **#EmbraceEquity**.

At ECRC, International Women’s Day is not just about the celebration, but also a time to acknowledge the struggles and the gains of many women and girls in our community who strive for equity and visibility to attain their full potential.

Through our diversity, Inclusion and equity strategies we have been able to impact our communities positively by the many intervention programs that we offer. Our programs are as diverse as the community that we serve.

As the Executive Director, I lead the path to set the tone and model the way for an equitable and Inclusive work environment. Whiles it is my responsibility to Ignite the conversation around diversity, equity and Inclusion, everyone understands the importance of this call to the work that we do at ECRC, hence all hands are on board to ensure equitable opportunities for everyone and the values we stand for as a resource centre.

We encourage all our employees and the community we serve, to be empowered and take opportunities to unlock their full potential.

ECRC supports the International Women’s Day, 2023 theme, and are committed to contributing our quota to fight and celebrate the gains that come when we Embrace Equity. On International Women’s day and every other day, we commit to **#EmbraceEquity**.
